OlyBond Classic from OMG Roofing Products Now Available in 55 Gallons

Agawam, Mass., December, 2011 - OMG Roofing Products, the leading supplier of two-part polyurethane foam insulation adhesives, is pleased to announce two recent improvements to its OlyBond Classic adhesive.

First, OlyBond Classic is now available as a single temperature formula, designed to work in temperatures ranging from 35°F to over 100°F. Contractors can easily control the adhesive "open time" by regulating their spray rig's temperature settings. The wide array of Factory Mutual approvals for OlyBond Classic are not affected by this change.

Second, OlyBond Classic is now packaged in 110 gallon sets (55 gallons per container) rather than 50 gallon (100 gallon) sets. This increase reduces the number of change-overs by 10% that contractors have to make on any job, providing even greater

production and less down time when compared with adhesive packaged in 50 gallon containers.

"OlyBond Classic has never been easier to use. The 110 gallon sets yield more coverage, and the single-temperature formulation takes the guesswork out of ordering," said Andy Cleveland, OlyBond product manager.

For more information on OlyBond Classic spray polyurethane foam insulation adhesive or any other product from OMG Roofing Products, feel free to call (800) 633-3800 or visit www.olyfast.com.
